Moss Green: #729d39

Forest Green: #36622b

Secondary Colors

Lime Green: #c6e377

Beige: #fbfad3

STYLE & SAMPLE FORTUNES

The design for this fortune teller game will be simple, with a white background and McLaren whimsical sans serif font used for the numbers and the letters shown throughout the game.

The fortune reveal will be a centered box in the middle of the screen. The box will be the dark forest green shown above and the font color will be white.

Four sample fortune results:

1. You catch more bees with honey
2. Travel is the one thing you buy that makes you richer
3. Life is short--eat your dessert today!
4. Sometimes the simplest choice is the best choice. Don't over-think.

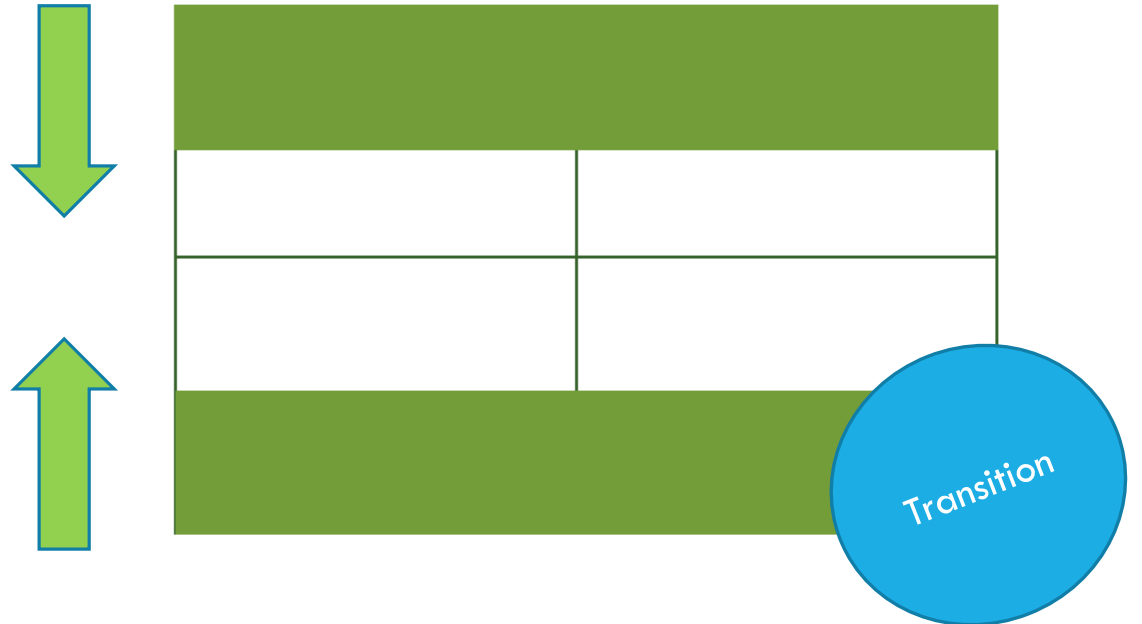

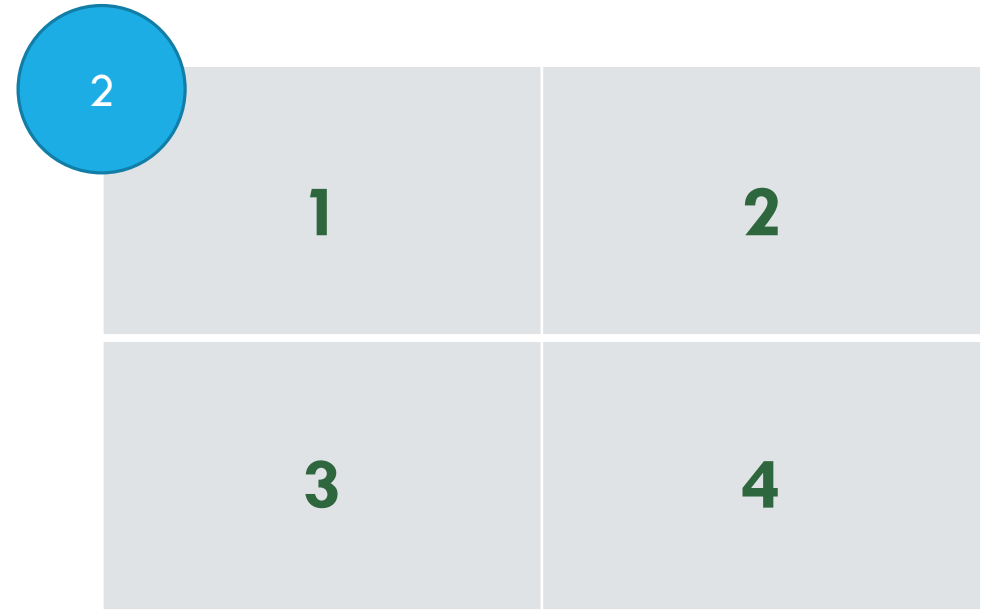

WHAT WILL THE CSS TRANSITIONS BE FOR EACH COLOR OR NUMBER CHOICE?

The user will pick a first color; the image will fold or flash the number of times the word is long. The user will then pick a number that will replace the words on the screen, and the image will fold that number of times before a fortune result pops up.

Time permitting, I'd like for the "folded" paper to be a different color than the white background (see example in the next slide).

FUNCTIONALITY

MOCKUP CONCEPT 1:

WHAT WILL THE CSS TRANSITION BE WHEN THE FORTUNE IS REVEALED?

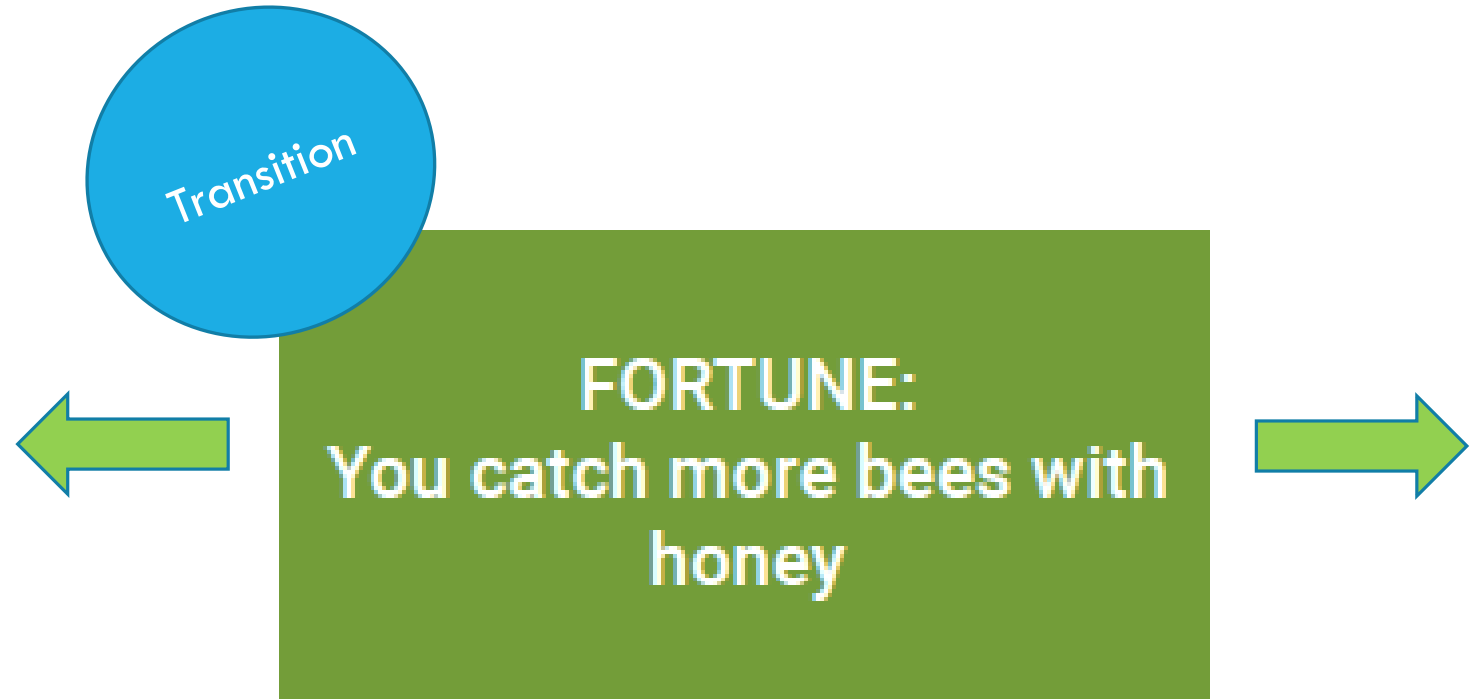

When the fortune is revealed and the cursor hovers over the box, the fortune's background will stretch in width from approximately 100px to 250px over the course of three seconds.

This will grab the user's attention in its growth/animation.

The CSS may look something like this:

```
.fortune {  
  width: 100px;  
  height: 100px;  
  background: red;  
  -webkit-transition: width 3s;  
  transition: width 3s;}  
  
.fortune:hover {  
  width: 250px;}
```

FUNCTIONALITY
MOCKUP
CONCEPT 2:

THAT'S IT!
